Green Project Title: "Greening of school's environment in and out"
--

Green Project timelines: September 2014 – January 2015
--

Project Summary	The project aimed at improving of the school environment (in and out) in terms of making it greener, cleaner and more attractive for the students and teachers as well as contributed to enhance their awareness, appreciation and respect towards a cleaner and healthier environment. To achieve this aim the school's Eco Club, Eco board, School director, Teachers, Parents' board and Local community all together helped with the planting of trees in the school garden and decorative plants inside the building and in the garden as well. All the staff played an important role throughout the whole phases of the project from planning and designing to coordination and to final implementation. In the end the project contributed in a better environmental education of the pupils and an increased awareness about the importance of a healthier, greener living aswell as the importance of green spaces for the relaxation and enjoyment of the everyday life and study time.
-----------------	--

Green Project objectives	1) Planting of trees and decorative plants in order to create a greener and healthier school environment
	2) Educate and increase awareness regarding the environment and environmental challenges
	3) Improving the school environmental quality and performance through fostering other similar events and initiatives as well as ecological practice
	4) Giving a good example on how working together can create a healthier environment for everyone to enjoy together
	5) Increase awareness regarding our connection to nature and its importance in our everyday life

Problem addressed and why?	The school garden was rich with flowers and mourning trees but with the problem of a limited flourishing time (mostly spring) and a ground not used to its full capacity. Therefore this initiative seeked to make use of the unused capacity of the garden by planting other type of perennial trees and plants which would resist more through time and also enrich the school garden and create a greener and more beautiful environment.
----------------------------	--

Activities and expected results

Activities	Participants	Implementation time	The required financial support	Expected results (achievements)
Activity 1. Coordination of duties, funds and buying the trees and plants	Eco club, Eco Board, Coordinator teachers, School directorate, Teachers' staff, Board of parents, Local	09/2014 – 01/2015		Kick start of the project and buying of trees

Green Schools; Clean environment; Healthier Life

	community			
Activity 2. Awareness campaign in every class regarding the importance of the trees, plants and the environment.	Eco club, Eco Board, Coordinator teachers, School directorate, Teachers' staff,	09/2014-01/2015		Increased awareness regarding the environmental issues and challenges.
Activity 3. Planting of trees, clean up of the garden and other plants and coordination for keeping the results	Eco club, Eco Board, Coordinator teachers, School directorate, Teachers' staff, Board of parents, Local community	09/2014-01/2015		New trees planted, cleaned garden and improved school environment

General budget	71,000 ALL
----------------	------------

Impact

Explain what effect will this project have for the school and the local community around it	A greener, healthier, more beautiful and more enjoyable environment for the students and the school staff as well as surroundings. An increased environmental awareness.
