Green Project Title: Separation and recycling of waste
--

Green Project timelines: till 31 December

Project Summary	The project aimed at increasing students and community's awareness about the environment, the impact of waste in our health and the importance of recycling. It sought to achieve this aim through the implementation of several creative activities from the students and eco club with the help of the teachers and the surrounding community. The participation and engagement of the community, teachers, parents and students was large and the activities resulted successful.
-----------------	--

Green Project objectives	1) Increase students and community's awareness about the impact of waste on health and the importance of separating and recycling waste materials
	2) Contributing towards a more sustainable society by giving a good example to other students and the community

Problem addressed and why?	Because of a serious lack of environmental awareness in the community the project tried to address the problem of the impact that human has to the environment and the impact that the environment has in people's health with a bigger emphasis on waste management and wasting behaviour.
----------------------------	---

Activities and expected results

Activities	Participants	Implementation time	The required financial support	Expected results (achievements)
Activity 1. Creation of posters, drawings and leaflets to inform the students and community about waste and recycling	Eco club, Teachers, Students, Parents, Local community			Increased awareness among students and the community about how to separate and recycle waste and the importance of doing so.
Activity 2. Implementing a research among the surrounding community about their waste usage	Eco club, Teachers, Students, Parents, Local community			Increased understanding and perception towards the environmental behaviour of the community and their awareness
Activity 3. Creating a green corner and recycling table	Eco club, Teachers, Students,			Improved eco-performance of the school, increased information and awareness about recycling and behavioural change among

Green Schools; Clean environment; Healthier Life

				students and teachers
Activity 4. Developing a theater play by the students with strong messages on the environment and recycling	Eco club, Teachers, Students,			Increased environmental awareness and behaviour change among students, teachers, parents and the community

General budget	500 EUR
----------------	---------

Impact

Explain what effect will this project have for the school and the local community around it	The project will impact the way how the students, teachers, parents and the community thinks about recycling and waste by looking at the information gaps and raising their awareness about environmental issues and the good impact that recycling has on the environment and on health.
