| Green Project Title: "Creating a greener and healthier environment in our school" |
|---|

| |
|--|
| Green Project timelines: 15 September – 15 December 2014 |
|--|

| | |
|-----------------|---|
| Project Summary | The project aimed to increase students, staff and community's awareness about the environment and its importance. Through an increased awareness it seeks to engage students and teachers in improving the school's environmental performance mainly through maintaining a clean school, through planting seedlings and plants and through putting to better use recycling materials. In addition it seeks to motivate everyone in the school to help maintain together the results of a greener and healthier environment which would benefit to them in the long term. In the end, it aims to give a good message to the local community and become an example of change. |
|-----------------|---|

| | |
|--------------------------|--|
| Green Project objectives | 1) Increase students environmental awareness for the importance of having a greener and healthier school environment |
| | 2) Creation from the students of a greener and healthier school environment |
| | 3) Measuring and assessing the continuous environmental performance and progress of the school |
| | 4) Communicating the green initiative to the local community and further |

| | |
|----------------------------|--|
| Problem addressed and why? | Creation of a greener, healthier and generally better school environment because of the need to : 1) Improve the environmental conditions of the school in order to have a better impact on the teaching and learning performance as well as health, 2) Create a more attractive and relaxing environment, 3) Give a strong message to raise awareness in the community and further. |
